LISTINGS & OUTPUT

PREFACE

As of 2021, DIFFER stops publishing an annual report with the year's highlights about our people, research, facilities, and events. These can be found on our website and in our newsletter EXPLORE.

We do, however, continue to list the most important output of our institute. In years past, we published it as an appendix to the annual report. Now, it is bundled in this document called DIFFER's Listings & Output 2021.

This document provides an overview of DIFFER's output. It includes listings of media appearances, PhD theses, MSc and BSc theses, and internship reports. It lists our publications in peer-reviewed scientific journals, other journals, conference proceedings, and books. And it mentions those who have guest lectured at conferences, meetings, and seminars or presented posters or given other presentations. It also sums up awards and positions (including editorships).

The lists are categorized along our two research lines: fusion energy and solar fuels.
