

# DIFFER LISTINGS & OUTPUT 2022

## Preface

Here you find the list of the most important output of our institute. In years past, we published it as an appendix to the annual report. Now, it is bundled in this document.

This document provides an overview of DIFFER's output. It includes listings of media appearances, PhD theses, MSc and BSc theses. It lists our publications in peer-reviewed scientific journals, other journals, and conference proceedings. And it mentions those who have guest lectured at conferences, meetings, and seminars or presented posters, or given other presentations. It also sums up awards and positions (including editorships).

For the first time, we have an *open software and databases category*. That's an increasingly important category in the age of open science.

The lists are categorized along our two research lines: fusion energy and solar fuels

*Cover image (part front and part back): In the summer of 2023, Emma Werkhoven and Lex Mannens, two students from the Design Academy Eindhoven are transforming the gray six-meter-long and one-and-a-half-meter-wide tube of DIFFER's Ion Beam Facility into a true work of art. One side will have a cutaway-like character with mainly purple and pink colors. Those colors are a reference to the colors of a plasma that is generated in the tube. The other side will be orange, the color of the Netherlands. Also, on that side, there will be space for DIFFER's logo and for posters about the research it facilitates.*
